DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-4, 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claims 2-4 and 8 all recite the limitation "transfer means". There is insufficient antecedent basis for this limitation in the claim. The amendment removed the language transfer means from the independent claim. It is believed the transfer means is the same as the holding means and the claims have been treated as such.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,384,634 to Takehara. Takehara discloses storage means (figure 15) for storing sheets conveyed from an image forming device; matching means (ST and 155) for regulating at least one end of a sheet bunch stored by said storage means to match said end of sheet bunch at a predefined matching position; staple means (200a) for

stapling said sheet bunch stored by said storage means; holding means (1107 and 38) for once conveying said sheet bunch matched at the matching position back in a first direction opposite to said one end of said sheet bunch and subsequently conveying said sheet bunch forward in a second direction toward said one end of said sheet bunch; and a controlling means (c12 lines 20+) for controlling said stapling means so as to perform a first stapling after once conveying the sheet bunch back in the first direction from said matching position and subsequently perform a second stapling after conveying said sheet bunch forward in the second direction.

Regarding claims 2-10 see figure 15 and c12 lines 20+.

Response to Arguments

6. Applicant's arguments filed 3-17-2008 have been fully considered but they are not persuasive. Applicant stated, "the apparatus disclosed in Takehara does not transfer the sheet bunch before the first staple is disposed." Examiner disagrees and maintains that Takehara does disclose stapling after once conveying as claimed. The sheets are initially conveyed by 38' and aligned (155' and ST) this being the first conveying. They are then stapled, conveyed a second time and stapled again as set forth in c12 lines 20+ and illustrated in figure 15.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
